

CONTENTS

Pages

- 253 Riemann-Hilbert problem for first order complex equations of mixed type with degenerate curve
WEN Guo-chun
- 264 Permanence and periodic solutions of delayed predator-prey system with impulse
SHI Hong-bo
- 277 The pricing of perpetual convertible bond with credit risk
WANG Le-le BIAN Bao-jun
- 291 Relations among homogeneity, collapsibility and nonconfounding in distribution effects
WANG Xue-li GAO Li
- 297 Estimation for nearly unit root processes with GARCH errors
YUAN Yu-ze ZHANG Rong-mao
- 307 Robust designs for models with possible bias and correlated errors
ZHOU Xiao-dong YUE Rong-xian
- 318 Weighted estimates for commutators of singular integral operators with non-smooth kernels
ZHANG Lin JIANG Yin-sheng
- 325 Bounds of the Estrada index of graphs
LIU Jian-ping LIU Bo-lian
- 331 On optimal binary signed digit representations of integers
WU Ting ZHANG Min DU Huan-qiang WANG Rong-bo
- 341 Redefined generalized fuzzy ideals of near-rings
ZHAN Jian-ming YIN Yun-qiang
- 349 Boundary properties for several singular integral operators in real Clifford analysis
YANG He-ju XIE Yong-hong
- 359 Weak WT_2 -class of differential forms and weakly \mathcal{A} -harmonic tensors
GAO Hong-ya WANG Yan-yan
- 367 Numericals for total variation-based reconstruction of motion blurred images
XU Qiu-bin
- 374 Convergence ball and error analysis of Ostrowski-Traub's method
BI Wei-hong WU Qing-biao REN Hong-min
