

CONTENTS

Pages

- 1 A new nonparametric stability test with an application
to major Chinese macroeconomic time series
CAI Nan CAI Zong-wu FANG Ying
- 17 An adaptive improvement on PageRank algorithm
LIU Gui-mei
- 27 On two actuarial quantities for the compound Poisson risk model
with tax and a threshold dividend strategy
WANG Wen-yuan XIAO Li-qun MING Rui-xing HU Yi-jun
- 40 Some generalized limit theorems concerning delayed sums
of random sequence
WANG Zhong-zhi YANG Wei-guo SHI Zhi-yan
- 49 Composite penalty method of a low order anisotropic nonconforming
finite element for the Stokes problem
WU Jing-zhu XING Xiu-zhi SHI Dong-yang
- 57 A second order isoparametric finite element method
for elliptic interface problems
FANG Xu-fa HAN Dan-fu HU Xian-liang
- 75 A multiscale Galerkin method for the hypersingular integral
equation reduced by the harmonic equation
LI Song-hua XIAN Jun
- 90 Boundedness of oscillatory singular integral with rough kernels
on Triebel-Lizorkin spaces
ZHANG Chun-jie ZHANG Yan-dan
- 101 Eigenvalue problem of a class of fourth-order Hamiltonian operators
WANG Hua HUANG Jun-jie Alatanancang
- 116 Spaces with σ -point-discrete \aleph_0 -weak bases
SHEN Rong-xin LIN Shou
