

CONTENTS

Pages

- 1 Hierarchical hesitant fuzzy K-means clustering algorithm
CHEN Na XU Ze-shui XIA Mei-mei
- 18 Parallel machine covering with limited number of preemptions
JIANG Yi-wei HU Jue-liang WENG Ze-wei ZHU Yu-qing
- 29 Convergence analysis of the corrected Uzawa algorithm
for symmetric saddle point problems
LU Jun-feng
- 36 Valuing Credit Default Swap under a double exponential jump diffusion model
YANG Rui-cheng PANG Mao-xiu JIN Zhuang
- 44 Almost sure limit theorem for the maximum of a class
of quasi-stationary sequences
ZHUANG Guang-ming PENG Zuo-xiang
- 53 On existence and uniqueness of solutions to uncertain backward stochastic
differential equations
FEI Wei-yin
- 67 Maximum principle for anticipated recursive stochastic optimal control problem
with delay and Lévy processes
LI Na WU Zhen
- 86 Rough singular integrals associated with surfaces of Van der Corput type
LIU Feng WU Huo-xiong
- 101 Sharp power mean bounds for Seiffert mean
LI Yong-min WANG Miao-kun CHU Yu-ming
- 108 Existence of periodic orbits and shift-invariant curve sequences
near multiple homoclinics
XU Yan-cong GENG Feng-jie
- 119 A construction of quasi-hereditary endomorphism algebras
WEN Dao-wei
