

CONTENTS

Pages

- 253 On uniqueness of (fuzzy) relation in some generalized rough set model  
*PEI Dao-wu*
- 265 Joint modelling of location and scale parameters of the skew-normal distribution  
*LI Hui-qiong WU Liu-cang*
- 273 An orthogonal basis for non-uniform algebraic-trigonometric spline space  
*WEI Yong-wei WANG Guo-zhao*
- 283 Bi-extrapolated subgradient projection algorithm for solving multiple-sets split feasibility problem  
*DANG Ya-zheng GAO Yan*
- 295 A variational formula for controlled backward stochastic partial differential equations and some application  
*MENG Qing-xin TANG Mao-ning*
- 307 Dirichlet characters, Gauss sums and arithmetic Fourier transforms  
*GAO Jing LIU Hua-ning*
- 317 A characterization of generator for multiresolution analysis with composite dilations  
*SHI Xian-liang CHEN Jie*
- 329 Estimates of three classical summations on the spaces  $\dot{F}_p^{\alpha,q}(\mathbb{R}^n)$  ( $0 < p \leq 1$ )  
*GAO Gui-lian ZHONG Yong*
- 339 Boundedness of fractional integral operators on  $\alpha$ -modulation spaces  
*WU Xiao-mei CHEN Jie-cheng*
- 352 Convergence analysis of a nonlinear Lagrange algorithm for general nonlinear constrained optimization problems  
*HE Su-xiang WU Li-xun*
- 367 A solution of the complex Ginzburg-Landau equation with a continuum of decay rates  
*XIE Jian TU Zi-heng*
- 374 On the maximal eccentric connectivity indices of graphs  
*ZHANG Jian-bin LIU Zhong-zhu ZHOU Bo*
