- 255 The compound class of exponentiated power Lindley power series distribution: properties and applications
Morad Alizadeh Seyed Fazel Bagher HOU Jun-cheng Saralees Nadarajah Ali Shaban
- 276 Dynamical study of discrete prey-predator system incorporating proportional prey refuge with interval parameters
Prasun K. Santra Ghanshaym S. Mahapatra
- 297 Chelyshkov matrix-collocation method for solving nonlinear quadratic integral equations
Rahele Nuraei
- 311 A neural network based on novel equivalent model for linear complementarity problems
KE Yi-fen XIE Ya-jun ZHANG Huai MA Chang-feng
- 327 Pricing power option under NIG model using fast Fourier transform
LI Cui-xiang WANG Meng-na LIU Hui-li LI Wen-han
- 343 Existence for neutral fractional differential equations in composite relaxation process
HE Jia-wei YU Zi-cheng
- 359 Optimal investment-consumption problem with discontinuous prices and random horizon
CHEN Tian HUANG Zong-yuan WU Zhen
- 375 Peaked traveling wave solutions of the modified highly nonlinear Novikov equation
LI Hui-jun WEN Zhen-shu LI Shao-yong
- 395 The transmuted epsilon distribution with applications in reliability engineering
Christophe Chesneau Hassan S. Bakouch Idika E. Okorie Bader Almohaimed
- 413 Some new results on parameter estimation of the exponential-Poisson distribution in ranked set sampling
CHEN Meng CHEN Wang-xue DENG Cui-hong
- 429 Certain subclasses of bi-univalent functions associated with (u, v) -Chebyshev polynomials
Timilehin Gideon Shaba Sibel Yalçın Gangadharan Murugusundaramoorthy Maslina Darus
- 443 Hölder's inequalities for a class of analytic functions connected with a certain hybrid-type vonvolution operator
H. M. Srivastava Sheza M. El-Deeb
- 458 Distributional scalar curvature and Einstein metrics
ZHANG Huai-yu ZHANG Jiang-wei
- 480 Almost global existence for d -dimensional fractional nonlinear Schrödinger equation on flat torus
DING Wan-ran LI Si-ming XUE Hui-ning
- 501 Uniform regularity for the Navier-Stokes-Fourier system in $\mathbb{T}^n$
